

Malena Andrade

Product Designer

Summary

Over 15 years experience working on software projects. I began as a front-end developer, crafting responsive web pages and apps while building component-based libraries. Leading projects, mentoring junior developers, and managing design execution sharpened my expertise, eventually guiding me toward design systems, UX, and branding. This evolution led to a consultant role, where I now advise startups on scalable, user-focused design solutions.

Experience

miBunker- Product Designer

January 2025 - April 2025 (4 months)

I led the transformation of the app from idea to prototype, defining its identity and direction. I engaged stakeholders in the branding process, strengthening the connection with the company. With a structured approach, I combined creativity, UX, and technical planning to develop a comprehensive strategy and create a prototype aligned with miBunker's vision.

Silverorange - Lead Designer

January 2020 - February 2023 (3 years)

Lead designer of app, marketing, and sales pages for clients such as EM:RAP, Starmaker, Hippo Education, and The Center for Medical Education. Direct communication with the client to understand their marketing vision and goals for their product. Including brand design and direction, responsive design, UX, prototyping and UI design systems.

Silverorange - Lead Front-End Developer

May 2015 - February 2021 (6 years)

Lead front-end developer on several large client projects including Mozilla, Air Institutes, EM:RAP, Hippo Education, and The Center for Medical Education. Work with the project manager to estimate tasks and milestones, create, assign and delegate tasks. Set up a front-end environment including project structure, initial stylesheets and component showcase.

Silverorange - Board Member

March 2018 - February 2023 (5 years)

Provide feedback on operational, financial and executive domains of the company. Engage vision and strategy planning, risk management and assessment of decisions affecting the company including shareholders.

Education

Toronto Metropolitan

University 2001-2005

B.A.Tech Graphic Communications
Minor in Marketing

Technology

HTML / CSS / JS (react.js)

Git / Visual Studio Code

Figma / Illustrator / Photoshop
